

COMMUNITY INTEREST STATEMENT

(beneficiaries).

1. We, the undersigned, declare that the company will carry on its activities for the benefit of the community, or a section of the community.

The company's activities will provide benefit to ...

- The farming community of the United Kingdom (Wales, Scotland, N. Ireland and England).
- Various community-projects within the United Kingdom with an interest in reducing greenhouse gas emissions. Including, but not limited to, housing associations and other social housing organisations with an interest in delivering net zero carbon strategies.

Activities:

SIDA AGROFORESTRY has been set up to help farmers across the UK to reduce their greenhouse gas emissions and to diversify their businesses into carbon positive products.

It will design and implement progressive land-use strategies that enable farmers to reduce greenhouse gas emissions and remove carbon from the atmosphere. The approaches used will also enable collaboration with local community-based projects.

The purpose is to combat the threat of climate change rather than to generate a profit for the directors.

Community benefits:

SIDA AGROFORESTRY has developed a unique approach to support our collective effort to reduce greenhouse gas emissions.

This approach to carbon mitigation will lead to the development of new products and services that reduce Greenhouse Gas (GHG) impacts and reduce farm input costs, in terms of feed and energy.

A secondary function of the business will explore potential for further emission reductions through unique shared-equity models and a localised carbon-resource trading platform that will facilitate the creation of a range of social-enterprises that will bolster long-term business and community resilience.

These social-enterprises can be run by community groups within a collaborative approach that involves farmers living in or nearby these communities.
